This is UNEVALUATED  
Information

1. The following observations were made in the Oggau-St. Margarethen area on 24 September 1954 between 0730 and 0915:

- a. Six men were seen in the area of the presumed radar station about 100 meters southeast of the Oggau railroad station. Some of them were engaged in cleaning work on two parked trucks and 1 van-like truck. No personnel were seen near the installation which was not in operation.
- b. The Token-type radar set, located east-northeast of St. Margarethen, regularly made 3 rotations per minute during the period of observation. No personnel were observed nearby.

25X1

Comment. The type of the presumed radar station had not been identified, since observation is very difficult. Efforts will continue to obtain a clarification on the type of equipment being used.
